## PUPPY TRAINING

(10 Weeks and up)

Our puppy training program has been built, modified and rebuilt continuously over the past 35 years. We started training puppies at a time when (believe it or not?) the vast majority of professional trainers said it was best to wait until the puppy was at least 6 months old or older to start training. In the mid 80s our training director questioning the industry standards at the time sought out and trained under some of the world's foremost authorities on dog training. It was at this time that we developed our first "Puppy Training Program" and unleashed it on the dog owning community. It was not long and our phone was ringing off the hook as pet owners, veterinarians and pet professionals were requesting our services! It was an exciting time and people were seeing the light as a result of having what is now considered a crucial head start. The industry was about to change, supported by not only the results we (and like minded trainers) were getting but by the science supporting early puppy training! Today, puppy training programs are the norm, but it wasn't always so. We were fortunate to have had the vision and desire to question the industry at the time. Over the last three and a half decades we have continued to reach out and study under some of the World's Top Authorities on Puppy Training. We continue to grow and develop our puppy programs with the goal of bringing you and your pup the most current and successful methods for raising and developing your "Pet Dog, Sport Dog or Working dog"!

Our Puppy Program is designed to help get you and your puppy off to the right start! We focus on building social skills, habituation, learning and reward systems, teaching obedience foundation skill sets, task work (Working and Sport Dogs) basic manners, house training and addressing and preventing concerns that may come in the future with maturity. With a solid puppy foundation, it makes coming into the teenage and adult dog's maturity much easier, as well as preventing the learning of bad habits that will have to be addressed in the adult dog. In many ways puppy training is the most important training you'll ever do with your dog.

With a good puppy foundation it will make advanced training skills easier to learn for both dog and owner as well as improving the quality of life for all involved.

To help prevent any misunderstanding in regards to your puppies maturity, we have provided a chart as a general guide to age and maturity expectations.

For example:

Dog vs. Human

16 week old puppy = to a 8 year old child

1 Year old dog = to a 14 year old child

2 Year old dog = to a 21 year old Adult

We recommend starting as soon as possible. Puppy programs can start at (8-16 Weeks).

# Recommended Program for Puppy's
